## PROFILE SUMMARY

Full Stack Developer with 2+ years of experience building scalable web applications using Next.js, React.js, TypeScript, Node.js, Express.js, and PostgreSQL. Experienced in developing enterprise e-commerce platforms, RESTful APIs, and AI-powered applications. Skilled in Retrieval-Augmented Generation (RAG), OpenAI APIs, LangChain, vector databases, and modern frontend architectures. Strong background in performance optimization, reusable component development, and delivering high-quality solutions in Agile environments.

## EXPERIENCE

**Full Stack Developer** March 2024 – June 2026
Dexian, India

### E-commerce Platform

- Developed a scalable e-commerce platform using Next.js, Node.js, TypeScript, and PostgreSQL serving 100K+ monthly users.
- Built Checkout, Payments, Wishlist, Product Listing, User Profile, and Order Management modules.
- Developed reusable React components and integrated RESTful APIs for seamless frontend-backend communication.
- Optimized application performance using SSR, SSG, lazy loading, and code splitting, improving Lighthouse scores from 68 to 92.
- Implemented responsive and accessible user interfaces using React.js, Next.js, Material UI, and Tailwind CSS.
- Collaborated with cross-functional teams and participated in Git-based workflows, code reviews, and Agile ceremonies.

### AI Knowledge Assistant Platform

- Built a GenAI-powered knowledge assistant platform using Next.js, React.js, TypeScript, Node.js, Express.js, and PostgreSQL.
- Developed Retrieval-Augmented Generation (RAG) pipelines using OpenAI APIs, LangChain, ChromaDB, and vector embeddings for contextual question answering.
- Designed and integrated APIs for document ingestion, semantic search, prompt orchestration, and chatbot interactions.
- Built reusable and scalable UI components using Next.js, React.js, TypeScript, Redux Toolkit, and Context API.
- Optimized frontend performance using SSR, lazy loading, dynamic imports, code splitting, and efficient state management.
- Implemented document processing workflows supporting PDF, DOCX, and text-based knowledge sources.
- Integrated Large Language Models (LLMs) with prompt engineering techniques to improve response quality and retrieval accuracy.
- Optimized retrieval performance using vector databases, metadata filtering, and embedding-based similarity search.
- Worked with PostgreSQL and NoSQL databases for structured and unstructured data management.
- Troubleshot production issues, optimized application performance, and collaborated in Agile development environments.

## PROJECTS

### GenAI RAG Applications

- Built RAG-based applications using Python, FastAPI, OpenAI APIs, LangChain, Pinecone, ChromaDB, and PostgreSQL.
- Developed document intelligence solutions with semantic search, vector embeddings, and contextual retrieval.
- Designed FastAPI-based backend services for document ingestion, embedding generation, retrieval, and AI-powered question answering.
- Built AI-powered workflows for question answering, summarization, document analysis, and chatbot automation.
- Implemented vector search and retrieval pipelines to improve answer relevance, retrieval accuracy, and response quality.

## EDUCATION

**Sathyabama Institute of Science and Technology**, Chennai 2020 – 2024

Bachelor of Engineering in Computer Science and Engineering

## SKILLS

**Frontend:** React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Material UI (MUI), Tailwind CSS

**Backend:** Node.js, Express.js, REST APIs

**Databases:** PostgreSQL, MySQL

**State Management:** Redux Toolkit, Context API

**Tools:** Git, GitHub, CI/CD, npm, Postman, GitHub Copilot, Cursor, Claude Code

**AI/GenAI:** OpenAI API, LangChain, RAG, Pinecone, ChromaDB, Vector Embeddings, Semantic Search
